Question -
do we want people
to need to click
into the bill
for more information
about it, or give
them the ability
to vote from just
the title?

Once the user has set up their
account, we can tell them who
represents them.

Open design Questions:

What triggers a push notification?

- bill newly introduced?
- bill getting out of committee?
- Amendments?
- Vote schedule? (i.e., any bill in a category of interest being voted on in 2 weeks)

Which bills trigger the notifications?

- Any bill in a user's interest?
- Specific bills the user follows?
